INTRODUCTION

This bibliography lists some 260 published and unpublished reports and sources of information relating to Northern Ontario. It is not an all-inclusive bibliography, but is selective in that it only includes more recent reports and only those which generally relate to economic conditions and developments in Northern Ontario.

The lengthy list of reports and sources indicates the considerable amount of work which has been done over the past ten years, and which continues to be done, to research, support and promote the development of Northern Ontario. The purpose of this bibliography is to assist in this ongoing process by making relevant information more widely known, and thus to advance efforts to promote Northern Ontario's further economic growth.

The reports found herein are listed under a number of key subject headings. These subject headings are indicated in the table of contents. Reports are not cross-referenced, but appear only once under the one heading to which they relate most.

To obtain copies of reports, one should note their status. Those indicated as "public" and followed by an "a" can be obtained from the Ontario Government Bookstore, 880 Bay Street, Toronto. Those marked "d" are available from any one of the various depository libraries listed at the back of this bibliography. Other items may be available from one or more of the individual ministry libraries which are listed in the Ontario Government Telephone Directory. Some however may have been prepared in very limited numbers, and may only be available from the particular organization or branch by which, or for which, the item was prepared. Those indicated as "restricted" are only available through, and at the discretion of the organization or branch responsible for the report.
